

Reference group meeting 2

Date: 01.11.17

Course: TMA4145

Participants

- Anders A. Andersen (BFY)
- Eirik Skrettingland
- Franz Leuf
- Kjetil T. Holm (BMAT)
- Mina Spremic (IndMat)

Feedback regarding the lectures

In general, students are satisfied with lectures. There will be a last meeting after the last lecture (22nd of November) a few days before (around the 18th of December) the exam, where students can ask the lecturer about the curriculum and/or the exam.

Some suggestions from students:

- Students wish the lecture notes to be updated – either before – or faster after the lecture. The lecturer said he would do his best, but it's difficult, since he wants the lecture note's ordering to be equal to the ordering of the presented material. Up until now, the curriculum has been somewhat different from previous years, so it has been a bit challenging to upload it exactly after the lecture, in addition to prior obligations, but going forward, this may be more doable, since the rest of the curriculum is similar to last year.
- Students also wished there would be less math typos in the lecture notes. Lecturer is very aware of this and is doing his best, it is being edited and corrected continuously. Students are also urged to point out mistakes if they find any, either during the lecture, or by sending an e-mail.
- Some students have wished for less time spent on repetition, and the lecturer will try to reduce the time spent on repetition, but noted that there may be other students satisfied with the current amount.

Feedback regarding the exercises

In general, there has not been much feedback around exercises, so this has been taken as a positive thing. In case students notice a mistake in the problem set they are urged to contact Eirik, who would correct it immediately.

- There was a wish for a complete list of which problems from the exercise sets that are taken from previous exams. This will be made.
