

Reference Group Meeting I

Date: Tuesday, 9th of February, 2021.

Attendance: Henriksen, Nylaeder, Pang, Tjernshaugen (full)

Lectures:

- (1) material is pitched at an acceptably challenging level
- (2) writing easier to see online --- slightly less accessible, but more preferable in person
- (3) cybernetics students would benefit from a fuller explanation of the mathematical notation
- (4) lecture titles/section titles would be helpful

Text:

- (1) Schaeffer and Cain is helpful for additional examples

Exercises:

- (1) it would be good to know if exercise sets are bi-weekly
- (2) problems in Exercise I were familiar from cybernetics courses
- (3) exercise sessions are all right --- if everybody went, there wouldn't have been enough time
