

## **TDT4295: Reference group meeting**

20.09.2022

- Gunnar is going to write a little more of what he says on the blackboard
- There is some material on definitions on measure- and group theory in the book. Otherwise, you should ask the lecturer!
- This exercise was difficult, the next is going to be a little easier
- Writing detailed feedback for all the students would be very time consuming, but you can ask Gunnar or Ekaterina about whatever you are wondering. We might also go through some tasks from previous exercise in the lecture if there is time.
- Independent study might be a bad idea for this course. It is best suited for a combination of lectures and reading.
- It would be nice if the students asked more questions during lectures, Gunnar is going to try stopping and taking questions during the lectures.
